Schram, 2002-12-02 Confined to an institution and further burdened by patriarchal assumptions and stereotypes, incarcerated women struggle to retain a sense of self-worth for themselves and often for their children. Scholarship on the subject typically has either ignored or trivialized the role of gender as an organizing feature of society. The result is a lack of emphasis on the role played by gender in the lives of women in a correctional setting. In this theoretically informed and empirically grounded textbook, Morash and Schram explain the realities of prison life for women from a feminist perspective. The hope for reform begins with an informed public so that a system premised on deterrence and punishment can also offer opportunities for rehabilitation.

spend the day sleeping, sun-tanning or doing whatever we want all day every day. --Karla Homolka in a letter to author Stephen Williams Well, they say 'Never say never' and they're right, Karla wrote in her startling first letter to Stephen Williams. Never in a million years did I think I would ever write a letter to someone from the media, let alone you who has condemned me so harshly. Thus began one of the most controversial correspondences in Canadian history. Karla picks up where Williams's first book on the case, *Invisible Darkness*, left her, painting her nails in her cell in solitary confinement in the gothic tower of Kingston's Prison for Women. After testifying against her ex-husband in 1995, Karla's life in prison was soon going to take a very different, dramatic turn. With a thriller's pace, *Karla: A Pact with the Devil* charts the inner life of the world's most notorious female prisoner. In *Karla*, Williams lets Karla and the other key players speak for themselves. And what they have to say will surprise, horrify and enlighten.

dr jane doe: *Human-Centred Software Engineering* Regina Bernhaupt, Peter Forbrig, Jan Gulliksen, Marta Kristín Lárusdóttir, 2010-11-18 The conference series HCSE (Human-Centred Software Engineering) was established four years ago in Salamanca. HCSE 2010 is the third working conference of IFIP Working Group 13.2, Methodologies for User-Centered Systems Design. The goal of HCSE is to bring together researchers and practitioners interested in strengthening the scientific foundations of user interface design, examining the relationship between software engineering and human-computer interaction and focusing on how to strengthen user-centered design as an essential part of software engineering processes. As a working conference, substantial time was devoted to the open and lively discussion of papers. The interest in the conference was positive in terms of submissions and participation. We received 42 contributions that resulted in 10 long papers, 5 short papers and 3 poster papers. The selection was carried out carefully by the International Program Committee. The result is a set of interesting and stimulating papers that address such important issues as contextual design, user-aware systems, ubiquitous environments and usability evaluation. The final program of the conference included a keynote by Liam Bannon with the title "Approaches to Software Engineering: A Human-Centred Perspective." This talk raised a lot of interesting questions for IFIP WG 13.2 and might have had some impact for participants to become a member of the working group. We hope that participants considered HCSE 2010 as successful as its two predecessors in terms of interesting discussions and new ideas for scientific co-operation.
